-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Regarding claims 44, 53, and 58, the phrase "may be" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "may be"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).
3. Regarding claim 58, the phrase "with or without" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "with or without"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).
4. Claim 58 is also rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification lacks description in the description in how to determine the prices of the old computer system with or without the reusable component or determine the prices of a new computer system with or without the reusable component.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 44-63 are rejected under 35 U.S.C. 102(e) as being unpatentable over Sidie (U.S. 6,170,056)

Sidie discloses a method of comparing:

Obtaining old configuration data over a first computer network for an old computer system from

♦ a first manufacture using a unique tag (bios; character string) that uniquely identified the old computer system (fig.1, fig.6);

♦ obtaining new configuration data over a second computer network for a new computer system from a second manufacture (col.3, line 35-col.4, line 34);

♦ electronically comparing the new configuration data and the old configuration data ( col.7, line 59-col.8, line 60);

♦ determining a compatible component list indicating at least one component of the old computer system that may be reused in the new computer system (col. 7, line 50-col.10, line 26; col.4, line 18- “this expandability is essential to keep pace with the rapidly changing world or computers where upgrades occur often”).
